REPORT OF THE ATTORNEY GENERAL
TO THE CONGRESS OF THE UNITED STATES
ON THE ADMINISTRATION OF THE
FOREIGN AGENTS REGISTRATION ACT OF 1938, AS AMENDED

JUNE 1956

TO THE SENATE AND HOUSE OF REPRESENTATIVES OF THE
UNITED STATES OF AMERICA IN CONGRESS ASSEMBLED:

I have the honor to report on the administration of the Foreign Agents Registration Act of 1938, as amended, pursuant to Section 11 of that Act, which requires the Attorney General from time to time to report to the Congress concerning the administration of the Act as well as the nature, source and content of political propaganda disseminated or distributed by agents of foreign principals registered under the terms of the statute.

This report deals with the administration and enforcement of the Foreign Agents Registration Act for the calendar year 1955 and is in supplement to the report submitted in June of that year which covered the five-year period commencing January 1, 1950 and ending December 31, 1954.

STATISTICAL SUMMARY

During the year, 66 new registration statements were filed and 55 statements were terminated leaving 282 active registration statements on file as of December 31, 1955. The 66 statements filed during 1955 represent the largest number of new statements received during any one year since the transfer of administration of the Foreign Agents Registration Act from the Department of State to the Department of Justice in June, 1942. An alphabetical list of the registrants who filed statements in 1955 together with the name of the foreign principal and a brief description of the nature of the agency is contained in Appendix II, while a list by registration number will be found in Appendix I. Eleven statements were filed by persons whose agency status was created by Section 20(a) of the Internal Security Act of 1950 (Section 1(c)(5) of the Foreign Agents Registration Act). This Section defines as an agent of a foreign principal any person who has knowledge of or who has received instruction or assignment in the espionage, counterespionage or sabotage service or tactics of a foreign government or foreign political party. As of December 31, 1955, a total of 87 registration statements had been received from persons whose agency status was created by this Section of the Foreign Agents Registration Act. A list of persons filing this type of registration statement during 1955 will be found in Appendix VI.

When a registration statement is filed by a partnership, corporation, association, organization or other combination of individuals each partner, officer, director or other person rendering assistance to the registrant on behalf or in the interest of the foreign principal is required to file a short form registration statement designated as

Exhibit A. During the calendar year covered by this report, 321 Exhibits A were filed and these are listed alphabetically in Appendix IV. The identity of the registrant in support of whose statement the Exhibit A was filed may be determined by reference to Appendix I through correlation of the registration number.

A functional analysis of the 66 statements filed during the calendar year reveals a pattern similar to previous years in that the largest number were filed by persons engaged in publicity, public relations, advertising or allied fields. The second largest number represented those engaged in legal and economic consulting services. A table showing the classification of statements according to the principal function reported will be found in Appendix III.

NATURE, SOURCE AND CONTENT OF POLITICAL PROPAGANDA

As indicated in previous reports the largest source of political propaganda disseminated in the United States continues to be the official foreign government information and tourist offices and foreign political parties which are primarily interested not only in the creation of good will for their respective countries but also in presenting before the American public their particular viewpoint on various international issues. Expenditures by foreign government information and tourist offices within the United States increased by well over a million dollars in 1955 over that expended during 1954, and represents the greatest increase in any one year since 1950. Approximately a hundred more persons were employed by foreign government information offices during the year 1955 than, for example, in 1952.

During the year 1955, there were 48 government information and tourist offices functioning within the United States, representing 30 different foreign countries. While some foreign governments maintain no official information or tourist office, as is the case with the Soviet bloc countries, other governments will maintain two or even three offices located strategically throughout the country.

One of the principal objectives sought by foreign governments in their informational programs is the promotion of tourist traffic. The American tourist plays an important part in the economy of many foreign countries and this fact is reflected, for example, in the increased expenditures by the Dominican Republic Information Center of nearly \$82,000 over 1954; of more than \$121,000 by the Irish Tourist Bureau; and an increase over 1954 of nearly \$158,000 by the Israel Government Tourist Office. The Government of Yugoslavia opened the Yugoslav State Tourist Office which reported expenditures of nearly \$10,000 for the first six months of its existence. Previous to the establishment of the tourist office, information with respect to tourism in Yugoslavia had been disseminated by the Yugoslav Information Center, which of course continues its activities in the informational field.

The British Information Services maintains the largest budget of any foreign government information or tourist office and has reported expenditures during the year 1955 of well over a million dollars. Together with the British Travel Association, Great Britain expended within this country during 1955, close to two million dollars for information purposes.

Foreign governments consider it highly important to place before the American public their views with regard to a number of international issues. This is reflected for example, in the opening of the Arab Information Center which describes itself as the official information office of the eight Middle East governments of Libya, Saudi Arabia, Egypt, Syria, Lebanon, Jordan, Iraq and Yemen. In its first year of operation the Center listed expenditures of approximately \$110,000. More than double that amount was reported as having been spent for information purposes by the Israel Office of Information.

A table showing the expenditures and number of employees of all foreign government information and tourist offices registered under the Act will be found in Appendix VII.

As stated in previous reports, many foreign countries continue to rely upon American public relations concerns and consultants for advice as to the nature and content of their propaganda material circulated to the American public. This of course is reflected in the large number of public relations firms, consultants, and advisers which are registered under the terms of the statute. Appendix VIII contains a summary showing the amount of money received by American individuals and organizations from their foreign principals during the calendar year covered by the report and included within this list will be names of all American public relations advisers and consultants who have been retained by foreign governments during the period.

A list of registered agents whose statements were in an active status as of December 31, 1954, set forth according to geographic area or nationality field will be found in Appendix V.

The principal propaganda trends noted during 1955 based on the material filed with the Foreign Agents Registration Section pursuant to Section 4(a) of the Foreign Agents Registration Act and the countries to which the material relates are:

China

The Chinese News Service is the principal media through which the Nationalist Government of China disseminates its information to persons within the United States. The propaganda material deals mainly with the various aspects of the government's campaign against the Communist regime and control of the mainland of China and will cover such diverse subjects as its views on international affairs, the application of Red China for United Nations membership, the diplomatic talks at Geneva and various personalities in the news.

Propaganda material from Communist China is disseminated by Edwin S. Smith, who conducts his business under the names of Sovfoto and Eastfoto Agency, and by Imported Publications and Products, a book store and subscription agency located in New York City. Considerable amounts of propaganda material from Communist China are also mailed directly to recipients in this country.

India

India's main sources of political propaganda are its embassy and the Government of India Information Services. Both distribute releases, bulletins and periodicals which express the governmental view on a variety of internal and international subjects. Major attention during the year was directed in the economic field to industrial development of the country, to trade relations, and particularly to the problems raised

by aid given to the country by the United States and the Soviet Union. The Portuguese Goa controversy and the relations between India and Pakistan were subjects of considerable comment.

Japan

This country's propaganda material was concerned primarily with the improvement of Japanese-American trade relations and the promotion of tourist travel via the Japan Airlines.

Indonesia

The Indonesian Embassy publishes and distributes a magazine entitled "Report of Indonesia" which is distributed as well by the Information Office of the Republic of Indonesia in New York City. This office also distributes news releases on a more or less regular basis. Matters of particular interest which were subjects of comment were the Asian-African conference at Bandung, the first general elections held in Indonesia in the tenth year of its existence as an independent country, and the trial of certain Dutch nationals allegedly engaged in subversive activity.

Germany

Through the registration of The Roy Bernard Company, which acts as a public relations adviser for the German Government, there is filed with the Foreign Agents Registration Section a bulletin issued by the Press and Information Office of the German Embassy. This publication as well as news releases attempts to convey to the American public an understanding of the German position on such questions as the unification of Germany, the diplomatic recognition of the USSR and the return of German prisoners. Tourist information regarding Germany is disseminated by the German Tourist Information Office.

France

The bulk of French propaganda is aimed at inducing American tourists to travel in France and publicizing France's economic achievements for the year 1955. "France Actuelle," which describes itself as a fortnightly report for Americans on modern France and the French Union, featured articles on economic developments which were considered particularly significant in the economic field. Considerable French propaganda material concerned itself with the conflict in the French North African possessions of Morocco and Algeria.

Great Britain

Practically every question that concerns the British nation or the Commonwealth was touched upon by the British Information Services through the media of printed matter, radio broadcasts, television and lectures given by visiting British dignitaries. This organization attempts to give the American people a glimpse into the social and economic life of the British people, the workings of the British Government and the ties that link it to the Commonwealth. A daily mimeographed sheet called "Today's British Papers" expressed the views of British newspapers in 1955 on such diverse questions as Churchill's retirement, the British truck strike, the Geneva conference, and the White Paper published by the foreign office on Burgess and MacLean. Other subjects touched upon were the British position in Cyprus and the visit of Soviet officials to India.

U.S.S.R.

The significant propaganda trends during the year 1955 are revealed in the various magazines, pamphlets and books disseminated by Imported Publications and Products and Four Continent Book Corporation, both of which are registered under the Act as agents of, among others, Mezhdunarodnaja Kniga, the All-Union Soviet Book Combine. Propaganda photographs are distributed by Edwin S. Smith, doing business under the name of Sovfoto Agency, and motion pictures from the Soviet Union are distributed by Artkino Pictures, Inc.

In publications from the USSR, the Soviet writers continued to attack the Paris Agreements which were signed in October of 1954 and the North Atlantic Treaty. Articles appearing in publications emanating from the Soviet Union continue to stress the theory that the rearmament of Germany is a menace to peace and that in fact rearmament of any nation in Europe constitutes nothing more than a delaying action on the part of Western powers since the Soviets believe that in the event of hostilities Europe would undoubtedly be abandoned. Despite this severe criticism of the West, the Soviet Government in its pronouncements sought the friendship of Great Britain and proposed the exchange of mayors of London and Moscow together with an exchange of city delegations. Also proposed was increased intercourse between leaders of science and arts and great stress was laid upon increased publication of British books within the USSR. Considerable emphasis was placed upon Russian proposals of a European

collective security system which would abolish the North Atlantic Treaty, the Paris Agreements and the Warsaw Treaty.

Turkey

The bulk of political propaganda material relating to Turkey is disseminated by the Turkish Information Office. It distributes a wide variety of material, but as would be expected a considerable portion of the literature was concerned with presenting the Turkish viewpoint in regard to the Cyprus question.

Arab States

Until the establishment of the Arab Information Center in 1955, there was little organized Arab propaganda activity within this country. However, the intensified Arab-Israeli dispute and increased economic and political importance of the Middle East has undoubtedly influenced the decision to establish the Arab Information Center in the United States to act as the principal outlet for propaganda material relating to the Arab countries of the Middle East.

The Arab Information Center disseminates press releases, a publication entitled "The Arab World" which describes itself as a monthly review of progress in the Arab countries; informative pamphlets on the Arab League, and a publication known as the Arab Information News Letter. These publications devote themselves to an account of the Arab position in the political sphere as well as the economic progress being made by each country. In this latter aspect particular emphasis has been placed on land reform, improved facilities for housing and industrial development.

The Palestine Arab Refugee Office established during 1955 holds itself out to be an unofficial political organization financed

by certain of the Arab countries for the purpose of defending the cause of former inhabitants of Palestine and to alleviate the suffering of Palestinian refugees. Another objective is to assist these refugees to regain their property rights within Palestine and its propaganda publications place the blame upon Israel for the present plight of these refugees.

Israel

The Israel Office of Information releases a large volume of propaganda each month which includes a weekly summary of news from Israel contained in a publication entitled "Israeli Digest." The Digest, as does other material, emphasizes Israel's position in the current Arab-Israeli dispute and the fears of the government incident to the arms deal made by Egypt with Czechoslovakia. Emphasis is placed upon Israel's problems incident to the immigration of Jews from other parts of the world, particularly the problem raised by Israel's plans to absorb 40,000 immigrants from North Africa.

LEGISLATION

No new proposal for amending the Foreign Agents Registration Act was presented to the Congress during the year 1955. I am, however, still in favor of the recommendations previously made to the Congress for amendments to the statute. I have recommended the enactment of legislation which would remove Section 20(a) of the Internal Security Act of 1950 from the Foreign Agents Registration Act and substitute therefor a separate registration statute so as to require the registration of persons who have received assignments or training in the espionage, counterespionage, or sabotage service or

tactics of a foreign political party irrespective of a technical agency status or relationship. Other recommendations made in 1954 are designed to strengthen and clarify the Foreign Agents Registration Act.

ENFORCEMENT

No prosecutions for a violation of the Foreign Agents Registration Act were instituted during the year 1955. The Department obtained what it considered to be compliance with the statutory requirements through its normal administrative procedures. A number of investigations for possible failure to comply with the provisions of the Act were instituted by the Federal Bureau of Investigation at the request of the Foreign Agents Registration Section. The Department has continued to rely on its normal sources of information and on the investigative efforts of the FBI in the administration and enforcement of the statute. In its administration of the Act the Department has continued to emphasize its main and original purpose -- the full disclosure of activity within the United States by agents of foreign principals who are engaged in political propaganda activities.

Respectfully submitted,

Acting Attorney General
