

This is an initial release of the FARA document search feature. For best results, online users should attempt to keep their search strategies as concise as possible. The site is designed to be intuitive to the user by simply selecting drop down menu options, combined with typing specific Name, Registrant Number, Country, Date Range or other pertinent information. Examples of effective search strategies are the following:

- Select Document Type: Short Form; Status: Active; Registrant Number: 1750

- Select Document Type: Exhibits A & B; Status: All; Country: Canada

- Select Document Type: Supplemental Statement; Status: All; Supplemental Date: Start: 09/30/2006  
End: 12/30/2006

- Select Document Type: Registration Statement; Status: Terminated; Received/Stamped Date Start:  
01/01/2006 End: 01/23/2007

The Department of Justice provides, through the Data Download tab on the FARA home page, further capabilities in near real time that offer FARA's data schema tables of information. This serves the needs of users who wish to export large volumes of FARA's public information to their personal computers in order to conduct additional research.

Thank you for visiting the FARA website. The Attorney General is committed to providing public access to FARA's public disclosure filings, both through this website, and at the FARA Unit Public Office. This more robust website portal provides access to this information 24x7. The Department of Justice encourages feedback from the general public and appreciates suggestions for improving this document search website tool. [Click here to provide feedback.](#)
